Kevin Dang

QA Automation Engineer | SDET | Playwright & TypeScript

Cambridge, United Kingdom

Phone: 07827928863 | Email: pendragon888@hotmail.com

LinkedIn: https://www.linkedin.com/in/kevin-dang-0b623ab5/

Professional Profile

Hands-on QA Engineer with extensive experience delivering high-quality web applications through a combination of manual and automated testing. Experienced in designing and executing functional, regression, integration, API, exploratory and cross-browser testing while contributing to scalable automation using Cypress, Selenium and Playwright.

Strong track record of collaborating with developers, Product Managers, designers, engineers and business stakeholders throughout Agile software delivery to identify risks early, improve test coverage and deliver reliable, user-focused software. Passionate about embedding quality throughout the development lifecycle, improving QA processes and promoting shared ownership of quality across teams.

Collaborative and detail-oriented, with a strong focus on understanding how systems work, identifying risks early, and taking ownership of quality for key product areas.

Core Skills & Technologies

Testing: Manual Testing, Functional Testing, Regression Testing, Integration Testing, Exploratory Testing, API Testing, Cross-browser Testing, Mobile Responsive Testing, User Acceptance Support, Risk-based Testing, Release Testing

Automation: Cypress, Selenium, Playwright (TypeScript), JavaScript, C#, Python (learning)

API and Integration Testing: REST APIs, Swagger, Postman, GraphQL, Authentication, Authorisation, Status Code Validation, Error Handling, Third-party API validation

Test Management: Jira, Zephyr, ServiceNow, Test Case Design, Requirements Traceability, User Stories, Acceptance Criteria, Defect Management, Root Cause Analysis

DevOps: GitHub, GitLab, Octopus Deploy, CI/CD, Docker

Methodologies: Agile, Scrum, Sprint Planning, Backlog Refinement, Risk-based Quality Assurance

Databases: SQL, MongoDB, PostgreSQL

Platforms: Web applications, cross-browser, mobile-responsive testing, AWS, Humio

Professional Experience

QA Automation Engineer – Abcam, Cambridge, United Kingdom

July 2010 – December 2025

Acted as primary QA owner, responsible for test strategy, release quality and QA sign-off across BAU and project work

Defined risk-based testing approaches, balancing automation and manual testing to optimise coverage and delivery speed

Built and maintained end-to-end automation frameworks using Cypress and Selenium, reducing manual regression effort by 40–50%

Designed and executed system-level test scenarios, validating complex workflows across APIs, third-party integrations, and UI layers

Collaborated with engineers and product managers to improve feature testability and system design

Contributed to CI/CD pipelines and test environments, supporting faster and more reliable deployments

Investigated production incidents using Humio and ServiceNow, improving observability and reducing MTTR by ~30%

Led bug triage and defect analysis, providing clear insights into quality risks and release readiness

Supported continuous improvement of QA processes, mentoring junior QA engineers and promoting best practices

Web Systems QA Analyst – Jagex, Cambridge, United Kingdom

April 2005 – July 2010

Validated multiple web-based systems and internal tools through structured functionality and system testing.

Designed and executed 50–150 test cases per release to ensure sufficient regression and feature coverage.

Collaborated with developers and product stakeholders to clarify requirements and ensure features are testable.

Raised and tracked defects with clear reproduction steps, improving defect turnaround time by approximately 20–30%.

Improved test documentation and QA processes to support consistent and repeatable test execution.

Selected Projects & Achievements

CI/CD & Deployment Optimisation

Contributed to CI/CD pipeline improvements, reducing deployment time by ~70%

System Integration Testing

Validated complex integrations (payroll, benefits, tax systems), ensuring data integrity across distributed systems

Compliance & Regulated Systems

Tested Safety Data Sheet (SDS) platforms and SOX-related systems, working within compliance-driven environments

Production Quality Improvements

Reduced production defects by ~30% through improved test coverage and QA processes

Reduced bug resolution time by ~50% via improved triage and collaboration

Education

B.Sc. Computing – University of Greenwich, United Kingdom

Certifications & Professional Development

ISTQB Certified Tester – Foundation Level

TestMu AI Test Automation & Software Testing Professional Certificates

Currently building Playwright automation using TypeScript for cross-browser E2E testing & learning Python

JMeter: Performance and Load Testing

Additional Information

Extensive experience working within UK enterprise technology environments.

Strong collaboration skills with cross-functional teams including engineering, product and operations.

Experience mentoring junior QA engineers and promoting QA best practices.

Eligible to work in the United Kingdom (British Citizen).

ATS Keywords: QA Automation Engineer, Quality Assurance Engineer, QA Engineer, Software Tester, Test Automation, Cypress, Playwright, Selenium, API Testing, Postman, CI/CD, Agile, Jira, JavaScript, SQL, UK
